## Bio

Lola was born with a rare heart defect that made her face life-saving surgery at the age of 12. That much was beyond Lola’s control. At a young age she learned to heal through positivity and helping others heal from the situations life throws at them. A communicator at heart, Lola can be seen, heard and read on traditional media, and non-traditional media alike. At 18, she has written two books and enthusiastically shares her zest for life with people of all ages and walks of life.
